

Speak your mind!

The Philips Digital Voice Tracer™ is an altogether nifty bit of kit! Great for capturing ideas wherever you are and whenever you want, the 7620 and 7670 give you 8 or 16 hours of recording time respectively and Voice Activation on both models is perfect for hands-free recording.

Whether you're a forward-thinking architect with a vision for the future or a musician bursting with catchy new melodies, the Philips Digital Voice Tracer™ lets you capture your creativity with breathtaking ease. And the Philips Digital Voice Tracer™ is ideal for the intrepid journalist ever ready for a sound bite; adjustable microphone sensitivity is perfect for that exclusive interview. Or perhaps you're an active student with a heavy lecture schedule; you can rely on the Digital Voice Tracer™ for accurate – and decipherable – conference or lecture notes.

The 7670 allows you to download straight to a PC, where you can conveniently play back the voice files and directly edit your recording. Enhanced download functionality means you can transfer 30 minutes of recorded data in just 2 seconds.

Plus you can convert voice files to WAV format, and send a voice message via e-mail. So why fumble for a pen and paper? The Philips Digital Voice Tracer™ - a memory that won't let you down!
