THE ULTIMATE IN PROFESSIONAL DICTATION SOLUTIONS

Philips SpeechMike™ Classic Barcode Scanner 6294

The SpeechMike™ Classic Barcode Scanner 6294 is a smart and compact, yet extremely powerful dictation device, which marries all the benefits of the versatile SpeechMike™ devices with the functionality of a barcode scanner. The integrated barcode scanner allows doctors or lawyers to swiftly retrieve patient or client records by simply scanning a barcode, while recordings can be linked directly to the patient record or client details. The ergonomically designed 6294 also features the familiar 4-Position Switch for easy, single-handed operation, while the dictation microphone and loudspeaker are of the high quality you would expect from Philips. The 6294's programmable control buttons can also be customised to users' individual needs.
